

Join Solar Spring Break and Get Involved with Solar through the Solar Energy Industries Association

Through our partnership with the GRID Alternatives Solar Spring Break (SSB) program, the Solar Energy Industries Association (SEIA) is committed to helping SSB volunteers stay engaged with and pursue careers in the solar industry. Whether your interests lie in advocacy, engineering, communications, or another field, participating in GRID's SSB program will open a number of opportunities for you to help you advance your career and interest in solar energy. Opportunities for SSB volunteers include:

- **Joining the Solar Power Advocacy Network** where you will receive updates on solar news, policy, and opportunities to engage your elected officials.
- **Getting involved with SEIA events** where you will learn about cutting edge developments in policy, research, and technology and network with experts and leaders in the solar industry.
- **Learning about internship openings at SEIA** in fields like government affairs, research, and communications.

About SEIA

The Solar Energy Industries Association (SEIA®) is the driving force behind solar energy and is building a strong solar industry to power America through advocacy and education.

As the national trade association of the U.S. solar energy industry, which now employs more than 250,000 Americans, we represent all organizations that promote, manufacture, install and support the development of solar energy. SEIA works with its 1,000 member companies to build jobs and diversity, champion the use of cost-competitive solar in America, remove market barriers and educate the public on the benefits of solar energy.
